

## *Treasured memories*

Babies, children, families, even pets. We want to look back in the future and remember a little snippet of life. I love spending time with families recording a little time capsule to look back on in years to come. I want you to look at these pictures and smile fondly as you recall a time when "she loved that red coat" or "Remember building dens in the woods?"

We have lots of family pictures on a slideshow and we watch them all the time talking about THAT holiday or how my son's hair used to stick up and my daughter loved her "DOAT" (it was a pink padded coat that she would never take off, she would have worn it to bed if we let her.)

For me that is what photography is all about - the remember whens. "Remember when he had those new wellies and he cried the first time he got them muddy?" "Remember when you were standing on that rock and a wave came right over your school shoes?" (true stories!)

That is what I want to create for other families, all the pictures that make you all say "Remember when..." Portrait sessions start from £150 so get in touch and lets make some memories.

*Hilary xx*
